Code-Layout, Readability and Reusability

This document evaluates the quality of the project configuration and implementation in terms of structure, readability, consistency, and reusability. The project is organized using clear naming conventions and reusable configuration steps for efficient data import and transformation.

Code Quality Checklist

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Naming	Clear and consistent names are used for Import Sets, Transform Maps and tables.	Yes	Easy to understand
2	Proper Structure	Import and transformation components are properly organized.	Yes	Well structured
3	Meaningful Field Names	Source and target fields have meaningful names.	Yes	Easy field mapping
4	Clear Configuration	Transform Map configurations are clearly defined.	Yes	Easy to maintain
5	Data Validation	Imported data is checked before storing in the target table.	Yes	Reduces errors
6	Reusability	Transform Maps and mapping configurations can be reused for similar imports.	Yes	Saves time
7	No Redundant Configuration	Unnecessary duplicate mappings are avoided.	Yes	Simple configuration
8	Error Handling	Import errors and incorrect records are identified and handled.	Yes	Improves data accuracy

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Import Set	ServiceNow	Spreadsheet data import	High
2	Transform Map	ServiceNow	Field mapping and data transformation	High
3	Field Mapping	ServiceNow	Source-to-target field mapping	High
4	Data Validation	ServiceNow	Imported record validation	Medium
5	Target Table	ServiceNow	Storing imported records	High

Overall Code Quality Assessment

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized configuration
Readability	5	Easy to understand and maintain
Reusability	5	Import and mapping components can be reused
Documentation / Comments	4	Configuration steps are clearly documented
Overall Score	**5**	**Good quality and reusable implementation**
